Allowable Subject Matter

1. The following is a statement of reasons for the indication of allowable subject matter: claims 16, 18, and 19 recite a moisture resistant fluorescent lighting fixture comprises a longitudinal and transverse O-ring gland formed under the housing mounting flange and an O-ring received in the O-ring gland in combination with a lens having an upwardly facing boarder defining lands configured to sealingly engage the respective longitudinal runs of the O-ring.

Claims 20, 22, and 23 recite a moisture resistant fluorescent lighting fixture comprises a longitudinal and transverse gland formed under the housing mounting flange and a seal received in the gland in combination with a lens having an upwardly facing boarder defining lands configured to sealingly engage the respective longitudinal runs of the seal.

The limitations discussed above are neither disclosed nor suggested by the prior art of record.

H.J. Poehling [US 2,327,552], J. Dunker et al. [US 2,791,681], J. Dunker [US 2,873,358], Florence et al. [US 4,323,954], and Mui [US 5,902,035] disclose a moisture seal or vapor-tight lighting fixture with a surrounding gasket, but none of them teach or suggest the longitudinal and transverse o-ring gland/gland to receive the gasket.

Urbanek [US 4,118,767] and Daumueller [US 5,735,596] disclose a vehicle lamp using an o-ring received in a groove, but there is no motivation or suggestion to use the groove of Urbanek or Daumueller into the moisture seal or vapor-tight lighting fixture above.

Claims 16-23 are allowed.
